DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first and second exhaust valves of claims 4, 5, 19, 28 and 29, the pressures sensor of claim 16, the third plate of claim 26 and the third envelope of claim 30 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 13, in line 7 "air inlet 44" should be changed to –envelope 44-; on page 13, in line 14 "exploded" should be changed to –exploding-; and on page 15, in line 19 "90. So" should be corrected to –90 so-.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 36 and 37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant has not describe in detail in the specification in such a way as to enable one skilled in the art to make and/or use the steering boards. Applicant has not described in detail such that it can be understood how the shape of the first and second steering boards are only limited by the steerage of the first and second steerage boards. The description on page 15, lines 17-21 does not enable one having ordinary skill in the art to shape the steering boards in a manner only limited by the steerage of the first and second steerage boards. Absent a description which make clear how the shape of the

Art Unit: 3617

steering boards is only limited by the steerage of the first and second steerage boards, one having ordinary skill in the art is not enabled to shape the steering boards.

Allowable Subject Matter

5. Claims 1-35 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

French 1.499.238 is cited to show the automobile first and second holders 1; first, second and third envelopes B; and first, second, third and fourth beams which attach the holders to the automobile.

Bingham, Jr. is cited to show exhaust valve 33'.

Alexander is cited to show pressure sensor 55.

Amrein et al is cited to show plates 20.

Boyd et al is cited to show the flotation system for a snowmobile.

Downey et al is also cited to show a flotation device for a snowmobile.

Kim is cited to show the device for floating an automobile comprising sensing means 1, key switch 6, emergency switch 6, control means 2, driving unit 3 and airbags 4.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherman D. Basinger whose telephone number is 703-308-1139. The examiner can normally be reached on M-F (6:00-2:30 ET).
